

# HOW TO SETUP WIFI SECURITY ON A BILLION 7700N MODEM

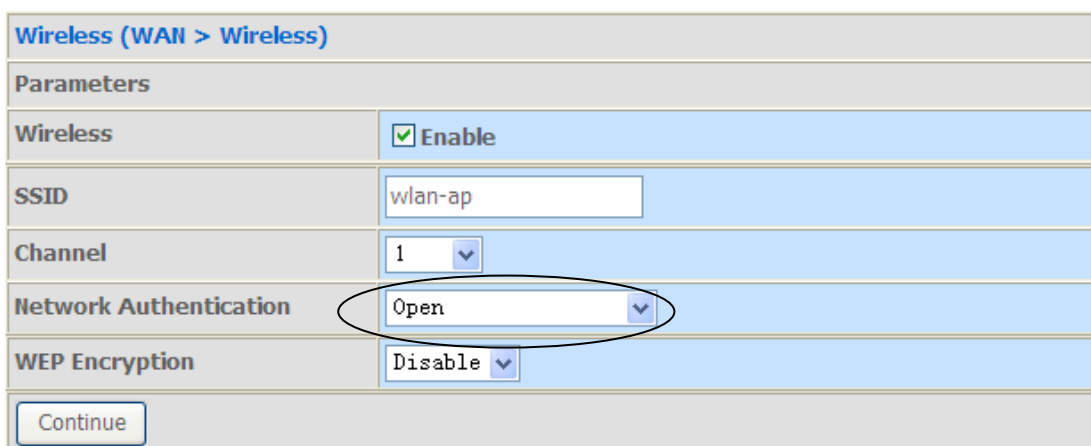

1. Open your web browser (eg Internet Explorer)
2. In the address bar type **192.168.1.254** and enter
3. When prompted enter username **admin** and password **admin**
4. Then select **Quick Start** from left hand menu

5. Click on **Jump to Wireless setting**

6. Change the setting for Network Authentication to **Mixed WPA2/WPA - PSK** (the last option in the dropdown list) then click "**Continue**"

7. Change **WPA/WAPI passphrase:** to a password of your choice. Must be minimum of 8 characters

### ⓘ **WPA-PSK / WPA2-PSK**

Network Authentication:	<input type="text" value="WPA-PSK"/>	<input type="button" value="v"/>
WPA/WAPI passphrase:	<input type="password" value="••••••••"/>	<a href="#">Click here to display</a>
WPA Group Rekey Interval:	<input type="text" value="0"/>	
WPA/WAPI Encryption:	<input type="text" value="TKIP+AES"/>	<input type="button" value="v"/>
WEP Encryption:	<input type="text" value="Disabled"/>	<input type="button" value="v"/>

8. Click on **Continue** then **Save/Apply**

You have now set up WiFi security on your Billion Modem.
