Speed

Typical download speed refers to the peak user period from 7pm-11pm each day. Typical download speeds for our **nbn** plans (7pm-11pm) are based on past measurements across a range of locations and connection technologies, and there may be times when your connection won't achieve these speeds. Typical download speeds for our **nbn** plans (7pm-11pm) may increase or decrease over time and aren't guaranteed minimum speeds. Actual speeds may be less due to several factors including network configuration, line quality and length, exchange type, customer premises interference, traffic and equipment.
